

Product Manager

The big picture:

Open-Mesh makes networking smarter and simpler. We help create low-cost, cloud-managed wireless mesh networks that automatically spread Internet connections throughout hotels, apartments, offices, schools, cafes, villages—and just about anywhere else. We have more than 80,000 cloud-managed mesh networks that serve millions of users every day, but we're just getting started.

Our small team is based primarily in Portland, Oregon with developers distributed in Europe and Asia. We're always looking to team up with other talented, hard working, and detail-oriented people. We believe in implementing great ideas, working smart and being ourselves on and off the job.

We're looking for an exceptional Product Manager who can take the lead on defining, building and evangelizing a smarter, simpler way to WiFi.

Your responsibilities:

As Product Manager, you'll play a key role in every customer-facing piece of our business. Here's what you can expect:

- Build business cases and work cross functionally to achieve consensus, for new product initiatives
- Translate product strategy into product requirements and roadmap, for existing products
- Work with engineers and program managers to drive product decisions during product development, while constantly representing the customer
- Drive product launches by working with sales, marketing and support teams and serve as key technical advisor to them
- Act as a product evangelist to build awareness and understanding of your launched products
- Maintain a healthy pulse of the industry and competitors

About you:

- You have a BA/BS in Computer Science, Electrical Engineering or a related field

- You ideally also have an MS and/ or an MBA from a top program
- You are passionate about building products and have empathy for customer pain points
- You're excited to work with cloud-enabled WiFi technology and are passionate about making it smarter and simpler
- You're self motivated, a strong communicator and you work well as part of a cross-functional, cross-cultural global team
- You have a proven track record of managing all aspects of a successful product throughout its lifecycle
- You have a solid technical understanding of WiFi standards, Network Protocols and APIs.
- You have past experience building and managing Hardware as well as SaaS products
- You are willing to work with teams across international time zones and cultures and willing to travel as necessary
- You live in the Portland, Oregon area or are willing to relocate
- Bonus: You have product management experience with a leading WiFi or networking vendor

Why you should work with us:

- The chance to help build a great product that customers love
- A small, talented and hard working team that's profitable and growing fast
- A competitive salary; fully paid premium health care and vision insurance for you and your family; stock option, 401(k), FSA plans and more
- Flexible vacation policy and paid holidays
- A great office in downtown Portland (US Bancorp Tower) with tons of natural light
- A flexible and casual work environment
- The best tools to work with

How to apply:
