Software Engineer

The big picture:

Open Mesh makes networking smarter and simpler. We help create low-cost, cloudmanaged wireless mesh networks that automatically spread Internet connections throughout hotels, apartments, offices, schools, cafes, villages—and just about anywhere else. We have more than 80,000 cloud-managed mesh networks that serve millions of users every day, but we're just getting started.

Our small team is based primarily in Portland, Oregon with developers distributed in Europe and Asia. We're always looking to team up with other talented, hard working, and detail-oriented people. We believe in implementing great ideas, working smart and being ourselves on and off the job.

As a Software Engineer, you'll integrate new products into the cloud, help us to improve and optimize our existing services and explore new technologies.

Your responsibilities:

- Improve existing services (C/C++/Go)
- Build large scale systems
- Collaborate with product owners and fellow engineers in the design and development of cloud native microservices
- Constantly take on new challenges and ideas as they come up

About you:

- BS in Computer Science or related area, or relevant work experience
- Love to learn and develop new skills continuously
- You have 3+ experience with C, C++, C# or Java
- You understand general programming concepts through any language
- Know-how in SQL and NoSQL databases, queuing and caching systems
- You're self-motivated, a strong communicator and you work well as part of a team
- You live in the Portland, Oregon area

- Bonus: Significant experience with large scale, high performance systems, Expertise with Amazon Web Services

Why you should work with us:

- The chance to help build a great product that customers love
- A small, talented and hard-working team that's profitable and growing fast
- A competitive salary; fully paid premium health care and vision insurance for you and your family; stock option, 401(k), FSA plans and more
- Flexible vacation policy and paid holidays
- A great office in downtown Portland (US Bancorp Tower) with tons of natural light
- A flexible and casual work environment
- The best tools to work with
